

FPI INDUSTRIES, INC

NEMA Grade - GPO-3

GPO-3 is a glass mat reinforced thermoset polyester molded sheet material, which is both arc and track resistant.

GPO-3 is a UL recognized grade and is highly flame retardant and low-smoke generating.

Typical applications for the GPO-3 laminate include high-voltage appliance insulators, bus bar supports, and barriers and mounting panels in switchgear, as well as other types of electrical applications.

The standard color on this material is red with a thickness range of 1/32" to 2".
